

# Aisha Ogunsola

07405725498 | aishahoguns@gmail.com | Glasgow, UK

---

## Summary

---

Data Scientist with hands-on experience delivering **end-to-end AI and analytics solutions** in healthcare and research. Skilled in **Python, SQL, predictive modeling, ML deployment, and experimentation**, with experience in **scalable pipelines, APIs, CI/CD workflows, and reproducible analytics**. Strong communicator capable of translating complex insights into actionable recommendations for technical and non-technical stakeholders. Passionate about applying analytics to **optimize learning experiences, personalize interventions, and create measurable social impact**.

## Portfolio

---

<https://github.com/aishahoguns>

## Work Experience

---

### NHS National Services Scotland | Remote

#### Data Scientist | 06/2025 - Present

- Designed and implemented **modular Python pipelines** for clinical equipment categorization, improving **data quality and consistency by 35%**.
- Applied SQL for data extraction, preprocessing, and validation, increasing **pipeline efficiency by 25%**.
- Developed **Streamlit dashboards** for senior BI stakeholders, enabling **30% faster decision-making** and actionable insights across departments.
- Created **synthetic datasets** and applied advanced similarity methods (**Siamese networks, ClinicalBERT, RAG**), improving **category-matching accuracy by 25%**.
- Maintained **scalable, reproducible workflows** supporting cross-team usage and Agile delivery.
- Collaborated in **Agile sprints** using Azure DevOps, contributing to **on-time delivery of multiple analytics projects**.

### Health Data Research UK | Glasgow, UK

#### Data Science Intern | 06/2025 - Present

- Developed **LLM-powered pipelines** for summarization and structured query answering, reducing manual analysis time by **20%**.
- Implemented **RAG pipelines** to extract structured insights from unstructured health survey data, increasing **data usability for reporting**.
- Conducted **prompt engineering experiments** to evaluate model reliability and accuracy for clinical queries.

### WorldQuant University

#### Applied AI Lab | 08/2025

- Built predictive models and neural networks with scikit-learn, PyTorch, and TensorFlow.
- Conducted feature engineering, statistical analysis, and data cleaning, improving model readiness by **40%**.
- Produced reproducible workflows using Git and Jupyter Notebooks for transparent collaboration.

### Think Through Nutrition | England, UK

#### Research Assistant | 08/2025

- Supported collection, cleaning, and analysis of nutrition and wellbeing data for digital interventions.
- Contributed to evidence-based reports improving program effectiveness, reducing reporting turnaround time by **15%**.

## Skills

---

- Programming & Tools:** Python (Pandas, NumPy, scikit-learn, PyTorch, Hugging Face), SQL, Git, Azure DevOps
- Data Handling:** Data cleaning, preprocessing, ETL pipelines, validation, large-scale dataset management
- Machine Learning & Experimentation:** Predictive modeling, neural networks, statistical analysis, A/B testing, generative AI (LLMs, RAG pipelines)
- Visualization & Reporting:** Power BI, Matplotlib, Seaborn, dashboards, data storytelling for technical and non-technical audiences
- Collaboration & Methodologies:** Agile delivery, CI/CD workflows, software testing, cross-functional teamwork
- Ethics & Compliance:** Data privacy, ethical handling of sensitive information

## Education

---

**Queen Margaret University | Edinburgh, UK**

**Public Health**

- Studied epidemiology, public health principles, research methodologies, and statistical analysis

## Certificates

---

IBM Data Science Professional Certificate
